Kevin Manda

Professional Programmer

I am a tech savvy individual keen on accelerating tech advancements in Botswana for better service and product delivery in and around Botswana to reduce queues and the tension that arises with poor delivery that can lead to failure of production of goods and services. I devoted all my time to developing the suitable data flow system for reduced traffic congestion and higher bandwidth speeds for Botswana and I work day and night to flawlessly merge the new system with our own!

CONTACTS		EMPLOYMENT HOSTORY
Post office	P. O Box 26119 Gaborone	• **Ultimate Solutions** Gaborone, Botswana System Engineer, Sales management They gave me a head start in familiarizing myself with the market as a tech enthusiast and allowed me to learn more skills under their wing but my learning time and working time collided with each other so I left for further studies (2017)
Website	CityNest.github.io/Life/Home	• **Koala Medical Center** Mogoditshane, Botswana Digital marketing A new company willing to discover the power of the internet and took me in to expose them to more clients over the internet, creating a website for them and managing their Facebook account. I left to pursue further studies (2018)
Email	Kevinmanda92@gmail.com	• **Moscat Agencies** Gaborone, Botswana System engineer, Programmer Moscat is an internet café which provides point of sales software for general dealers around Botswana and to some parts of Africa since I got to assist other companies remotely from other countries such as Namibia. I left to increase my studies (2020)
Physical Address	Block 6, Gaborone 38082 Lemonyane Drive	• **Kamoso PTY(LTD)** Gaborone, Botswana Digital marketing, networking Kamoso is a well-established supplier from Botswana, I had the opportunity to represent

		this company online and also help them move data securely from one computer to the other in various points around the city on a cheap and reliable data plan. I left to Kamoso to focus on my skills as a programmer (2020).
